

Product Information

Paper Elements' range of inkjet media products has been developed to achieve the very best printing results from all brands of inkjet printers and inks. The last decade has witnessed great advances in digital photography and inkjet printing and our high grade products are now at the forefront of the digital print boom. We firmly believe in the concept that it is the standard of the paper and coating which counts in the quality of the picture that leaves the printer, no matter how good your digital camera and equipment is.

Our range contains some of the finest inkjet papers in the world, producing vibrant prints that look and feel like conventional photos. Our most popular product items are continually stocked within our large UK based warehouse and are ready for immediate delivery. For the full list of these items and package sizes please see immediate stock listings. We can also supply any tailored format sizes in an array of weights and finishes from small photo card sizes to large industrial rolls.
